YACHT-POOL SEA WEATHER FORECAST

Reliable information about changing weather conditions is an absolute must for a responsible skipper. But we also know how waiting to hear the weather report at fixed times of the day can limit the daily schedule, and how annoying it is when the radio transmission is unclear. That's why we now offer a timely weather forecasting service that can't be beaten for reliability and convenience.

If you've just listened to the current weather forecast and the transmission quality was poor, you no longer need to get upset. Because you now have the option to download a forecast twice daily on your mobile phone. This continually updated report is for your specific region of travel and covers the next 36 hours of weather.

In co-operation with an international network of weather forecasting services, and under the aegis of the Austrian Centre for Meteorology and Geodynamics, we have succeeded in developing a flawless information service.

Nevertheless, as a responsible skipper you should seek to inform yourself about expected weather from other sources as well.

HOW DOES IT WORK?

You just fill out the "Yacht-Pool Weather Forecast" application, telling us when and for what region you want the SMS weather report. You can calculate the total price for your trip by multiplying the daily rate by the number of days you require.

Twice daily, you will automatically receive the most current forecast of weather in your region for the next 36 hours, in the form an SMS message sent straight to your mobile phone over any cellular network. If you intend to travel through more than one region, please let us know where and when you would like to receive the service.

You also welcome to fill out the application on our Internet homepage.

YOU NEVER PAY MORE THAN YOU HAVE TO!

- **Automatic delivery** is **much cheaper** than making an active request from overseas.
- No package price. You only pay for the days **you request**.
- **No** roaming charges, unlike those associated with active requests.
- **No** hidden charges because of **waiting periods**.

A SAMPLE OF YOUR SMS WEATHER FORECAST:

Region: 23 CAZ = Cote d'Azur

Do00 = Thursday, 00.00 hours

8C = 8 degrees Celsius

5bftNE = Wind factor 5 bft (Beaufort) from the
Northeast

Wh0, 4mNE = Cloudy, waves from the Northeast, 0.4
metres high

Do12 = Thursday 12.00 hours (12 noon)

9C = 9 degrees Celsius

3bftE = 3 bft from the East

Wh0, 4mNE = Cloudy, waves from Northeast 0.4
metres high

There will be no information about:

- Wind direction when less than 2 bft strong
- Direction or size of waves when less than 25 cm high.

GENERAL BUSINESS TERMS & CONDITIONS

YACHT-POOL'S weather forecast is offered exclusively on the basis of the following terms:

1. Payment for the service must generally be made through automatic bank transfer.
2. The offer is non-binding and subject to confirmation by YACHT-POOL. It shall be the applicant's responsibility to verify the terms of YACHT-POOL'S confirmation promptly after receiving the same. If the confirmation contains discrepancies, these must be brought to YACHT-Pool's attention without delay.
3. YACHT-POOL shall not be responsible for service delays or breakdowns due to force majeure or other disruptions which make it difficult or impossible to provide service. For example: Problems in obtaining data, operating malfunctions, injunctions from public authorities, etc. The same shall apply to disruptions suffered by our suppliers/contractors.
4. All usage rights are copyright-protected. Any usage beyond the scope of the applicant's personal use shall be prohibited.

YACHT-POOL may cancel the contract at any time without giving prior notice. Insofar as YACHT-POOL is not able to provide the agreed service, YACHT-POOL shall promptly reimburse the entire or pro-rated amount paid.
5. Neither YACHT-POOL nor its suppliers/contractors shall assume any liability for the accuracy of the weather information provided.
